Smart Accessories

PARKING GUIDANCE SYSTEM (PGS)

- Saves time and stress with real time and accurate indication of available parking spaces
- Increased capacity utilization of the car park
- Reduces congestion and improves traffic flow
- Increased security within the car park
- Increased revenue and statistical information for better monitoring

FACE RECOGNITION SYSTEM

Face Recognition System is a biometric method of identifying an individual by comparing live capture or digital image data with the stored record for that person.

- Hospitality sector uses it for security against suspects in their data base as well as recognizing frequent customers / guests to provide enhanced premium services on repeat visits.
- Governmental and Defence security sensitive establishments use it as a deterrent for non registered visitors
- Police Departments create data base of criminals and suspects and FRS helps in detecting intrusion and movement in sensitive areas.
- FRS at airports and borders to monitor movement of suspect people.

LICENSE PLATE RECOGNITION SYSTEM (LPRS)

- Primary and critical technology for information and identity of vehicles entering the facility
- Information for billing, identification and access of permit holders
- Security alerts for problematic vehicles and enforcement violators

CAR PARKING PAYMENT/ MANAGEMENT SYSTEM (CPS)

- State of the art machines.
- Highest standards of design, functionality, ergonomics, reliability and efficiency
- CPS for multi level parking facilities, car parks and outdoor parking.
- Opportunity to effectively and profitably enhance business model for parking management.

UNDER VEHICLE SCANNING SYSTEM (UVSS)

- UVSS uses the proven Line Scan and Area Scan imaging technology
- Combination of high end electro-mechanical assemblies, cameras, illuminators, sensors and image processing software are used.
- Perfect solution to scan, inspect and digitally record underside of vehicles
- High quality and efficient inspection against explosives, weapons, narcotics and other contrabands hidden under vehicles

BOOM BARRIERS AND BOLLARD

Automatic Boom Barriers – Offer efficient security at entry and exit points of factories, office complexes, condominiums, parking lots, toll plazas or any roadway entry where medium to heavy traffic is expected.

Bollards – For locations requiring high impact protection against vehicle ram-raid or smash and grab intrusions.
